

## 2

5 a request initiating client machine having a web browser and a  
6 network connection with the web server; and  
7 an output device selected by a user and supporting an information  
8 exchange protocol and a control interface for receiving forms transmitted from  
9 the web server and rendering user-perceptible forms.

1 2. The apparatus of claim 1 wherein the client machine comprises  
2 a handheld browser-capable internet access device.

1 3. The apparatus of claim 1 wherein the client machine comprises  
2 a personal digital assistant (PDA).

1 4. The apparatus of claim 1 wherein the web server forms  
2 solution comprises a Java capable browser implemented via a web page to  
3 generate desired forms.

1 5. The apparatus of claim 1 wherein the network connection  
2 comprises an internet connection between at least one of the client machine  
3 and the web server, and the output device.

1 6. The apparatus of claim 1 wherein the information exchange  
2 protocol comprises Jetsend, and the output device comprises a Jetsend capable  
3 hard copy output device.

1 7. The apparatus of claim 1 wherein the web server comprises a  
2 Java vending machine, the Java vending machine operative to pull a user  
3 selected Jetsend job from a server file system and transmit the Jetsend job to a  
4 user selected Jetsend output device.

Amendment A*

3

1           8.     The apparatus of claim 7 wherein the web server further  
2 comprises an HTML interface operative to generate and store a cookie on the  
3 web browser of the client machine, the cookie containing specific information  
4 detailing a user selected form to be printed and a network address for the  
5 output device selected to generate the form.

1           9.     The apparatus of claim 1 wherein the information exchange  
2 protocol of the output device comprises Jetsend, and a specific selected form  
3 comprises a Jetsend job.

1           10.    The apparatus of claim 1 wherein the output device comprises  
2 a Jetsend capable printer having a Jetsend address.

1           11.    A forms storage, retrieval and printing system, comprising:  
2 a server including a memory, a database defined in the memory, a  
3 forms solution for supporting forms generation and transmission, and a control  
4 interface for generating and transmitting forms as electronic material across a  
5 network interconnected with the server;  
6 a request initiating client machine having a browser and a network  
7 connection;  
8 an output device selected by a user and supporting an information  
9 exchange protocol and a control interface for receiving forms transmitted from  
10 the web server and rendering user-perceptible forms.

1           12.    The system of claim 11 wherein the network comprises a  
2 World Wide Web.

1           13.    The system of claim 11 wherein the client comprises an  
2 interface access device.

*S/N: 09/310,073  
Case: 10980623-1  
Amendment A*

## 4

1           14. The system of claim 11 wherein the output device comprises a  
2       recording client machine.

1           15. The system of claim 11 wherein the control interface  
2       comprises a Raster transmission protocol.

1           16. The system of claim 15 wherein the Raster transmission  
2       protocol comprises a JetSend capable device.

1           17. The system of claim 11 wherein the network connection  
2       comprises an interconnection between the client machine and the server.

1           18. A method for selecting and printing forms remote from a user,  
2       comprising:  
3           accessing a web-capable server with a web-accessible client machine;  
4           selecting a form to be printed from a selection of forms stored on the  
5       server;  
6           selecting a web address of an output device for printing the selected  
7       form having an information exchange protocol and a control interface for  
8       receiving forms transmitted from the web server and rendering user-perceptible  
9       forms; and  
10          printing the rendered form at the output device.

1           19. The method of claim 18 wherein the step of selecting an  
2       output device web address and a form to be printed comprises the step of  
3       storing the web address and the form temporarily within a cookie of the client  
4       machine, and transmitting the cookie to the web server.
